# Business software for waste management and recycling

enwis)<sup>®</sup> is the world's leading fully integrated business software solution for organisations in the Recycling and Waste Management sector. Developed using award-winning Microsoft Dynamics NAV<sup>®</sup> ERP technology, the solution has helped organisations of all sizes and in sub-sectors such as Hazardous Waste, ELV, WEEE handling, Metal Recycling, Paper Recycling and Municipal Waste Collections to operate more efficiently and effectively.

enwis) is a proven solution already enabling businesses to:

- Reduce overheads by removing duplication of effort and consolidating information into one solution
- Reduce the time spent carrying out administrative tasks allowing time saved to be invested in value-add tasks
- Increase efficiency by joining up processes throughout the organisation
- Allow better business decisions by improving access to accurate information on business performance
- Facilitate compliance with legislation
- Improve cash flow (e.g. through reduced debtor days and timely and accurate invoice production)
- Improve customer satisfaction by reducing errors and formalising customer-centric processes

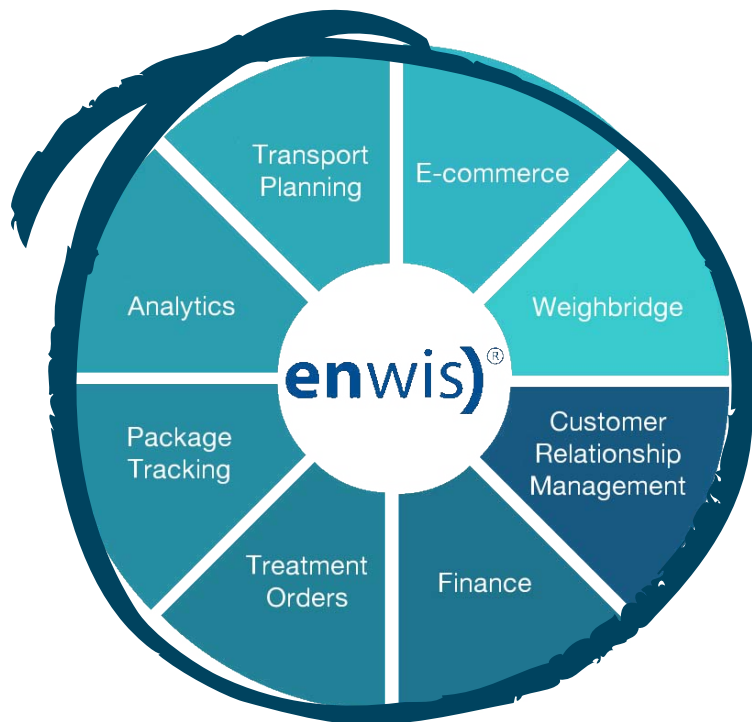

“Since the implementation of enwis), we have been able to expand our service and incorporate more customers. Our customers are very pleased with the changes we have instigated, as no one else offers them this level of service.”

- Jon Clement, Logistics Manager, Valient Recycling

enwis) is built to work with the latest Microsoft business productivity applications, such as Microsoft Office 2010 and Microsoft SharePoint Server 2010, allowing you to take advantage of the most recent advanced features to improve productivity and gain deeper insight. They also run smoothly with the Microsoft Application Platform and IT Infrastructure products, including Microsoft SQL Server 2008, Windows 7, and Windows Server 2008.

With increased system efficiency, reduced IT administration and hardware costs, and enhanced security and connectivity, you can enable your business to adapt more quickly to change and better manage your assets and resources.

enwis) has been known to increase operational efficiencies by over 20%

## Why enwis)?

- **Simple to learn and use.** Get people up to speed fast with an intuitive user experience that works like and with familiar Microsoft® programs. Access to Microsoft Dynamics RoleTailored tools and business intelligence helps employees view and prioritize job-specific information and tasks so they can work fast and smart.
- **Backed by Microsoft.** With the power of Microsoft research and development and the support of thousands of developers, partners, and support staff, you can feel confident investing in Microsoft technology.
- **Improved Planning & Scheduling:** Waste disposal and treatment orders, quotations and contracts may be easily set up from a single interface. Workers, equipment hire, vehicles, third party carriers, storage and treatment costs can all be scheduled instantly from the receipt of an order or contract.
- **Improved Operational Efficiency:** enwis) includes extensive functionality for managing the material collection, transport and disposal process. Drivers, vehicles and operatives may be managed and deployed, with comprehensive functionality for flexible and accurate costing and pricing including a sophisticated service price tool module.
- **Easy-To-Use Solution:** enwis) is powered by Microsoft Dynamics, and has the familiar look and feel of popular Windows desktop applications, removing the “fear” of using a new product.

“Without doubt enwis) has helped us improve our productivity and the flexibility of the design has enabled the business to more than double in size without any of the usual administrative problems this normally causes.”

- Garry Bogue, Financial Controller,  
AVR Safeway

Qurius provides technology answers: design, architecture, infrastructure, deployment and systems management of Microsoft-based business and IT solutions. Headquartered in Zaltbommel, the Netherlands, we serve customers across Europe, including Belgium, Germany, Austria, the Netherlands, Spain, the United Kingdom and the Czech Republic. In 2010, we openly declared a target of 100 per cent sustainability by 2014. A bold objective, designed to drive the company to European leadership in the field of sustainable ICT. We aim to be the number one choice for customers with the same ambition and the same sustainability goals. Qurius has been publicly quoted on Euronext Amsterdam since 1998.
